Enterprise Mobility + Security

Simplify security, stay productive

Protect data and empower workers

Security breaches cost U.S. financial organizations an average of $20.8 million in 2014,* with attackers spending an average of 200+ days in a network before discovery.

Microsoft Enterprise Mobility + Security (EMS) helps reduce security risk and enable worker productivity with features like:

- Identity and access management
- Information protection
- Device and application management
- Cyber intrusion detection

Platform choice · Single sign-on 2500+ apps · Device choice · Mobility

Single identity platform to secure data, apps and devices

Finance security needs	EMS can help...
Control access to client data	**Implement multi-factor authentication (MFA)** to help prevent unauthorized access. **Secure information** across file servers, email, and collaboration platforms with **document tracking and encryption**.
Lock down devices used by mobile workers	**Ensure all devices and applications are up to date** to help protect against vulnerabilities. Enforce **corporate security policies on corporate-owned and personal devices** to ensure data is secure even if devices are lost or stolen.
Avoid regulatory fines and penalties	**Centrally manage and secure devices** so they comply with Sarbanes-Oxley (SOX) and other government regulations for securing financial data. **Quickly provision and deprovision identities and access** for new, temporary, or exiting employees.
Prevent negative brand exposure and litigation costs	**Identify cyber attacks** before data is compromised **using behavior-based analytics** that leverage Machine Learning to inspect all network traffic.
Provide workers with simple, secure access to 2,500+ apps	**Enable single sign-on (SSO) so workers only need one password** to access all the applications they need.

Azure Active Directory Premium • Azure Rights Management • Microsoft Intune • Advanced Threat Analytics

Why EMS is right for finance

EMS includes Azure Active Directory, Azure Rights Management, Microsoft Intune, and Advanced Threat Analytics to provide organizations with cost-effective, comprehensive security for users, devices, applications, and data.

Layered protection against data theft

- Behavioral analytics to pinpoint cyber attacks before information can be compromised.
- Trusted multi-factor authentication engine that processes billions of requests every week.
- Data encryption that follows documents everywhere.

Low licensing and implementation costs

- Comprehensive security coverage for nearly half the price of third-party solutions.
- Self-service password reset can reduce Help Desk calls by an average of 25%.
- Simple set-up, always up to date, and connects to your on-premises datacenter.

Secured, flexible access to company resources

- Single sign-on to any application on your favorite device.
- Corporate policy enforcement for accessing resources from corporate or personal devices.
- Managed access to more than 2,500 pre-integrated SaaS applications, as well as your own custom cloud or on-premises hosted web applications.
